

## Alexander THIERMANN

Pacific Feeder Services

### *“Andean Cameloids: Transport in the Andes and Air Transport”*

My presentation will cover Andean Cameloids, their history and habitat as well as transport in the Andes and air transport. The presentation will be divided in 5 chapters: history, CITES, chacos, transport and uses.

- The history will give a short background of what has happened with these animals when the Conquistadores arrived.
- On CITES I will clarify some errors in the IATA LAR book.
- Next, the Chaco chapter will expose the benefit of the use of these ropes.
- Under “Transport”, preparing for shipping, stocking density, animal behavior, etc will be explained.
- And finally a short description of the uses of these animals
