CEIV Certification and Welfare

Overview
IATA teamed up with the Centre of Excellence for Independent Validators (CEIV) to oversee a growing need to improve industry standards and provide solutions on how the industry can achieve this.

THE NEED:
- For more safety, security and efficiency
- To raise the bar to (re)gain confidence
- To improve compliance to standards/regulations
- For Independent assessment vs self assessment
- To identify and recognise those who are excelling in the industry

THE SOLUTION:
- Develop standards with regulators and industry stakeholders
- Train industry stakeholders on standards and regulation
- Assess operations against standard checklists
- Train independent validators on standards and regulations
- Certify and then register best players on a certified website
- Get state recognition to ensure ongoing audits are valid for all participants

CEIV Certification and Welfare

**CEIV Live Animals Strategy focuses on:**

- Enhancing the capability of modern live animal transportation
- Promote a uniform approach for the handling of live animals
- Improve Animal health and welfare through appropriate risk management
- Reinforce trust through transparency and communication
- Protect the safety and welfare of animals globally

**With the following key objectives to ensure animal safety and welfare:**

- Improve transportation of live animals in compliance with existing regulations and standards
- Elevate staff competency level through efficient and robust training program
- Ensure all animals are transported safely and humanely by air
- Support and recognise organisations in their compliance with live animal regulations

A little about us:

- Family owned and operated business for 28 years
- Specialise in international and domestic pet travel
- Transport 65,000+ animals per year
- Based in Australia and New Zealand with transit lounges in Melbourne, Sydney, Brisbane, Perth and Auckland

Proudly partnering with:
Why did we participate?

• Pet welfare by raising the industry standard in process and handling
• The opportunity to learn from the process and improve
• What we do matters
• Reuniting families
• The cost of non-compliance was too high of a risk for us not to participate
Our approach and methodology

- Why we chose our team; our champions
- What were our challenges?
- How we managed the project through to completion?
Needed to put focus during the program on:

- Quality Management
- Supplier Management
- Technology Enhancements
Indirect benefits of completing the program:

- Ownership responsibilities and quality
- Staff knowledge, training and tools
- Automation and links
- The end-to-end process of moving a pet and the critical touch points when pets are in our care

Why it is so important that others participate in the program...
